**WHY CHOOSE LAFORCE**

LaForce focuses on providing solutions, not just products, for our customers’ needs.

**Who We Are**

Since our start as a hardware supply business in 1954, LaForce has grown to become a leader in the door, frame and hardware industry. Throughout the years, we’ve added products, services and locations to support our customers’ growing needs. Our services have grown to include security integration, certified fire door inspections, specification writing, custom manufacturing, installation and pre-installation. Today, LaForce is one of the largest providers of commercial doors, frames, door hardware, security and building specialties in the United States.

**Why We Are Different**

Unlike most door and hardware distributors, each department at LaForce specializes in a different task involved in the sale and completion of a job. Because each employee is an expert in their field, LaForce is able to complete jobs efficiently and accurately. Additionally, our employees pool their knowledge to supply fully integrated openings, from frame to security hardware, that meet our customers’ design, function and code requirements. Furthermore, customized computer programming allows for seamless communication between departments, and our own fleet of vehicles allows for better control over delivery time.

• Bass Pro Shop - Round Rock, TX

St. Frances Xavier Chapel
Chicago, Illinois
DOORS & FRAMES
Custom Sizes & Profiles • Hollow Metal • Stainless Steel
Aluminum • Wood • Fire Rated • FRP

Our engineers have the expertise to supply door and frame components for any size project for both new construction and remodels. Additionally, our in-house manufacturing enables us to modify doors and frames for unique hardware, custom build metal doors and frames from scratch, manufacture stainless steel doors, and manufacture and modify fire rated doors and frames.

DOOR HARDWARE & KEYING
Locksets & Latches • Electrified Hardware • Exit Devices
Door Closers • Hinges • Auxiliary Door Hardware • Key Control

From architecturally designed openings to the remodel of a current opening, LaForce is able to provide door hardware that makes the opening code compliant, functional and aesthetically appealing. With access to all major hardware manufacturers, we can supply products for any application. LaForce's keying experts are dedicated to carefully planning key systems to allow for convenience without sacrificing superior building security.
SECURITY PRODUCTS
Access Control • Video Surveillance
Alarm Systems • Intercom Systems

LaForce customers know the value of our one-stop shop capabilities as a leading provider for the entire door opening, which includes electrified door locking hardware. Our team of experienced security integration specialists will meet with you to discuss your security concerns. Then, we will engineer a comprehensive, user-friendly security system. LaForce provides security systems for any type of facility, from a small office building to an expansive multi-building campus.

BUILDING SPECIALTIES
Toilet Partitions & Hardware • Restroom Accessories • Lockers
Access Panels • Mailboxes • Flagpoles • Fire Extinguishers & Cabinets
Wall Protection • And many other Division 10 products

As a distributor of over 100 different building specialty products, we can supply the finishing touches needed to make a building complete. Additionally, our Division 10 experts will help make your public restrooms ADA compliant through proper placement of toilet partitions and grab bars.

OUR SERVICES

SPECIFICATION WRITING
Professional & Qualified Consultants • Offer AIA Accredited Continuing Education Classes
Knowledgeable in Building Codes

Our relationships with all major door hardware manufacturers allow us to offer unique solutions to new challenges. We are capable of integrating door, frame and hardware information directly into a project’s BIM model. We have experience with all types and sizes of commercial construction, including Healthcare, K-12 Education, Higher Education, Luxury Residential, Corporate and Industrial.

PRE-INSTALLATION
Shop Applied:
Hinges • Locks • Latches • Exit Devices • Door Closers • Electrified Products

LaForce contributes to both Lean construction and green practices through its pre-installation (shop applied) service by installing door hardware prior to doors being shipped to the job site. LaForce’s installers are able to catch manufacturing or product defects and rectify them prior to the doors arriving at the project, making more efficient use of the time taken on site to install the doors. Our shop applied process allows all packaging and scraps to be recycled rather than being left in the job site dumpster, which then goes to the landfill. As an added bonus, when door hardware is shop applied, the doors are delivered closer to the on-site installation date, thereby reducing chances the doors will be damaged on the job site.

FIELD INSTALLATION
Qualified & Professional Installers • On-site Field Installation

Using our installers allows you to use one source for both material and labor. Our continuously trained hardware professionals install doors, frames, door hardware and specialty products at the jobsite in a timely, proficient manner. If an issue should arise with your product, our installers can fix the issue in a cost-effective manner without extensive delay to your project.

1.800.236.8858
SECURITY INTEGRATION
Security Products • Technical Support • Security Evaluation Lab • Product Partners
LaForce has remained at the forefront of access control and continues to evaluate today’s fast-changing technology when recommending cost-effective measures to solve customers’ security needs. We have the knowledge and capability to tailor the technology to meet your budget and security plan.

CUSTOM MANUFACTURING
Metal Doors & Frames • Custom Frames • Stainless Steel • Lead Lined Metal
Metal doors and metal door frames are the main products manufactured in LaForce’s shop. It is the customization of these products that makes LaForce unique, allowing customers to design openings to enhance their building’s appearance. In the frame shop, most design requests can be fabricated. In both the wood and metal door shop, standard or conversion doors can be modified, reworked, and prepped for unique hardware.

PRE-FINISHING
Custom Paint Colors • Dust Controlled Environment • Durable Finish
The LaForce paint booth is in a dust controlled environment, eliminating the risk of contaminating our finishing. With a variety of different paint colors to choose from, we can custom match our customers’ needs. Having your product pre-finished before delivery eliminates the hassle and expense of finishing on-site.

FIRE & EGRESS DOOR INSPECTIONS
Avoid Liability • Protect the people in your facility • Certified Inspectors • Current on Codes
By contracting LaForce’s Certified Fire Door Inspectors, you can increase public safety and limit personal liability. As Fire Safety Codes NFPA-80 and Building Codes NFPA-101 gradually adopt the requirement of an annual fire rated opening inspection for commercial and multi-residential buildings, maintenance personnel as well as general contractors can take advantage of LaForce’s inspection services.
To provide expert technical knowledge, service and door opening solutions which protect life safety and building security. We deeply value our strong relationships with business partners, clients and associates, developed through professionalism and integrity, while supporting a continuous growth culture.
