GALVANIZED VS. GALVANNEALED STEEL

GALVANIZED

"G" designation

Shiny & industrial finish

Soft & malleable

Less expensive

Reacts to munatic acid

Zinc coating created through hot-dip process

Rust & corrosion resistant

Thicker coatings offer better corrosion protection

Interior & exterior applications

GALVANNEALED

"A" designation

Matte & reddish finish

Strong & hard

Easily welded & painted

Secondary process to create zinc-iron alloy

Recommended choice for steel doors & frames
