

KEY SYSTEM PROCESS

LAFORCE PROVIDES THE FOLLOWING KEY PRODUCTS AND SERVICES:

- Interchangeable Cores
- Patented Key Systems
- Standard and High Security Key Systems
- Multiple Manufacturers' Keys In Stock for Quick Turnaround
- Custom Key Cutting
- Core and Cylinder Rekeying Capabilities
- Development of Key Schedules
- Design of Key Systems

LaForce's keying experts design effective keying systems that maintain superior building security. We guide building owners and facility managers throughout the keying process. When planning a key system, we consider the current system's functions and potential future needs.

KEY SYSTEM PROCESS

LaForce keying specialists partner with project managers to provide quality products and a convenient system.

- 1 Initial Meeting**
If required in the specifications, LaForce staff members meet with the building owner to determine the building's security needs.
- 2 Design the System**
Our experts use the owner's security needs to outline a functional system.
- 3 Match Products**
LaForce's team of experts recommends products that best fit owner requirements.
- 4 Finalize the Plan**
After the building owner chooses a key control policy, implementation plan, and record management system, LaForce finalizes a keying plan to fit the personalized processes.
- 5 Save the Plan**
After the building's keying system is complete and the door locks are installed, LaForce securely stores the building's key system record for future reference.
